

Dee And Deaw Adventure with ASEAN

Indonesia

One ordinary day, Dearr is happily reading a comic book.

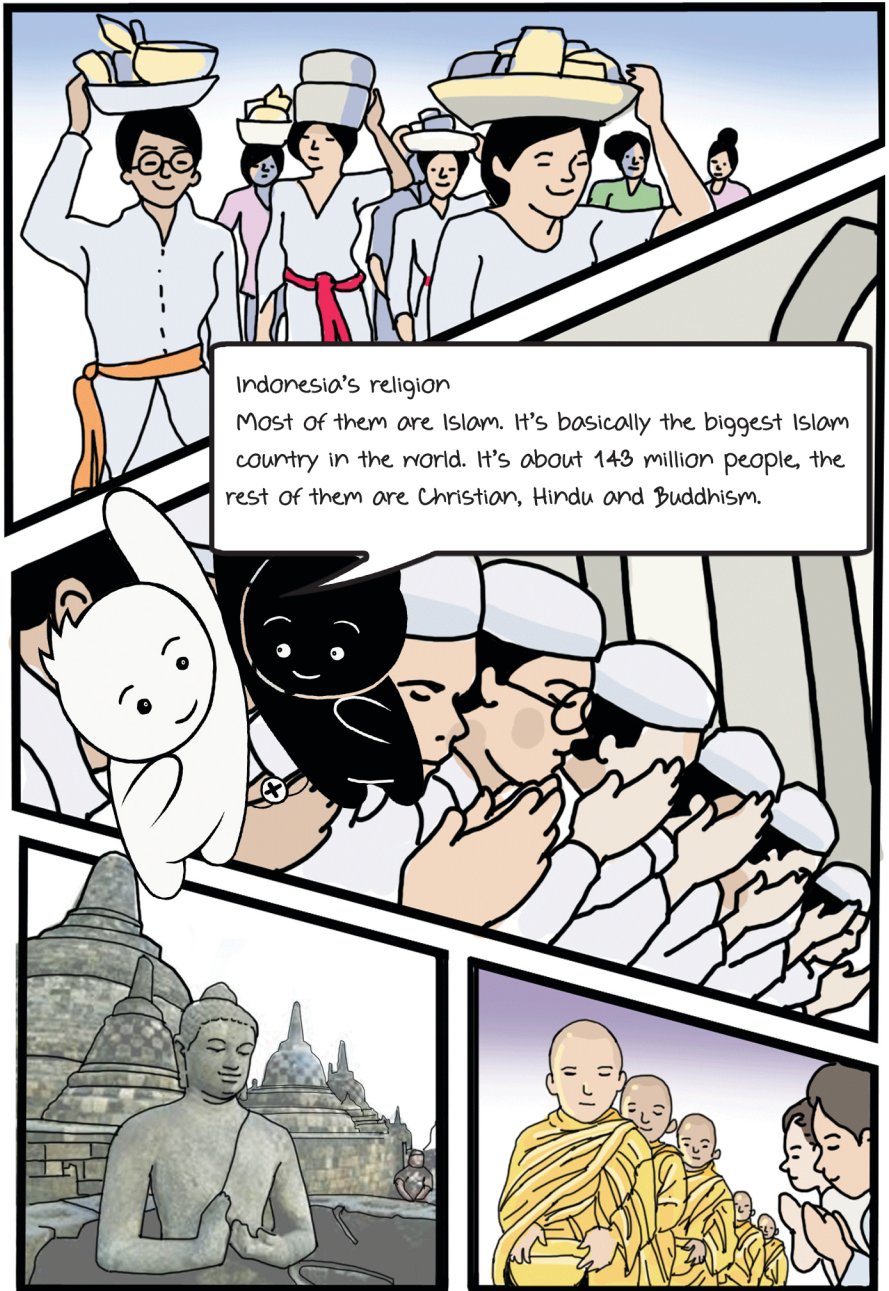

So it's true that Indonesia is surrounded by 17,500 islands, but only 3,000 islands have people lives on them. Indonesia is 10 times larger than Thailand with population over 250 million people.

The Indonesian Constitution provides "all persons the right to worship according to their own religion or belief" and states that "the nation is based upon belief in one supreme God." The Government generally respects these provisions;

Because of Islam religion in Indonesia, the government puts those teaching (Islam's moral and discipline) in Education at School. So, the student will not only have knowledge but how to live their life, too. The government also printed comic books called Tunas Integritas, blooming of morality, about Islam's teaching, for 5 – 12 years old children for gives them a good social value.

The government realizes that if we do not start with Good; about morality and good social value, one day everything they've done will be wasted including economy, good environment, arts and great building. The Big brother of Asia will be passed to another country instead, but if they can raise morality to grow along the country. Not only the country will be better but people in the country will keep a good culture and a symbol that shown to the world how Indonesia is too.

Its core is to love each other; depends on relationship for example lover, friends, family, and neighbor. Kotongroyong is to help each other when needed. It can be in many ways, harvesting, planting also redding.

Indonesia is main exporter of petroleum in ASEAN.

They also have a really high-technology and great docks.

Actually, Indonesia is one of the countries that growing fast and having a sustainable economy.

All I have told you is just some parts of Indonesia. There are a lot more great thing hidden in this Big country of ASEAN.

Do you believe now? This country has likely population to Thailand with a unique social value. They believe in only one and the same God. They are so united and trust in democracy which passes through ages to ages. And they are untidily shown by their action in social.

So, that's why people in Indonesia are so justice.

Hooray! I love democracy

See you next time!
